Figure 1 Sensitivity Temperature Dependence

Figure 1 shows the variation of sensitivity due to changes in temperature.

This data is taken from a typical batch of sensors.

Figure 2 Zero Temperature Dependence

Figure 2 shows the variation in zero output caused by changes in temperature, expressed as ppm gas equivalent, referenced to zero at 20°C.

This data is taken from a typical batch of sensors.

Figure 3 Batch Repeatability

Figure 3 shows the response to 400ppm H₂S for 64 sensors. Repeatable zero, fast response and stable output are the result of good process control.

This data is taken from a typical batch of sensors.
