Figure 1 Response to Gas

Figure 1 shows the typical response to 50ppm NH₃ at 20°C
 t_{50} is significantly faster than t_{90} (30 vs. 150 seconds) and shows the sensor's ability to respond quickly to NH₃.

Figure 2 Linearity

Figure 2 shows the deviation from linear response from 0 to 100ppm NH₃, with 0 and 70ppm reference concentrations.
